SUMMARY

I'm a frontend developer who brings websites and apps to life. Using my skills in HTML, CSS, and JavaScript, I build the parts that users see and interact with. I'm all about making things look awesome and work seamlessly on different devices. I collaborate with design and backend teams to create user-friendly experiences. I'm a problem solver, ensuring everything looks great and functions smoothly. I also work with frameworks like Bootstrap for responsive designs, React for dynamic interfaces, jQuery for interactivity, and Tailwind CSS for streamlined styling. Learning is my jam, as I stay updated with the latest trends and frameworks to keep improving user interfaces.

EXPERIENCE

Front End Developer
PixelFlame Software Pvt. Ltd.   **July 2022 -August 2023, Bihar**

· As a frontend developer in my previous company, I was responsible for creating and implementing the user interface and visual elements of various web applications. My role revolved around translating design concepts and user experience requirements into functional and engaging web interfaces. Here's a breakdown of my key responsibilities and accomplishments.

· I collaborated with the design and backend teams to build responsive and user-friendly web applications. Using my proficiency in HTML, CSS, and JavaScript, I developed interactive and visually appealing interfaces that ensured seamless user experiences across different devices and browsers.
